

Dear FCC,

I encourage you not to expand the LPFM spectrum into FM 88.7 within the Phoenix area. The FM AIR1 radio station currently uses this frequency. AIR1 services me as a resident of the local community with a unique clear alternative to other radio programming. AIR1 is able to report on issues and ideas of local relevance. There is no other radio station in the Phoenix area that provides the AIR1 format if AIR1 goes off the air. I believe maintaining AIR1 is clearly in the public interest with its communality interest news and music programming. A loss of AIR1 is a loss of diversity in the Phoenix area radio content.

Thank you for your consideration,

Bernie McKibben
